Guilty pride get shown to the light one of no faith must
pay the price live your life searching live your life
searching forget all the answers that once meant
something justify the color and drag through release
all your doubts and see it's true open your mind to pre-
answered ways here is your guidebook have a nice day
this belief is crumbling strip the signs break the wings
i've left so much inside i don't know if i can get it out
inside my head my breath is paralyzed get down on
your knees i'll believe i'm being judged i'm being
judged i'm being judged i'm being judged man will fall
get down man will fall no man's will is that strong man
will fall get down man will fall sped head first to crash
wall now it's all gone couldn't change things see what
you made when it's too late one two coming through
down devastation down destination just a fixation i
guess i am broken life get shown in despite one of no
faith prays 525 and it was missing and it was missing i
