We were closer
than I've ever been before, with anyone
If it's over, don't know how to break the fall
Don't know how to give up

Will i ever know
how to let this end
Will your love keep haunting me
We can bring it back to where it began
I'll tell you whats killing me

Remember what we used to know
How the other felt before it showed
Like we were one, the same
Now i dont even see ur face
Gave up all that we had, it got erased
I guess thats just the danger
Cause now we're just like strangers
Strangers
Now we're just like strangers
Strangers

What happened
Cause we're going nowhere now
We're falling out
I keep slipping on my feet
'til i hit the ground
I cant be the only one
Wish that we could start this over again
I just need to know the
when u looked at me
was it just pretend
I'll tell u whats killing me

Remember when we used to know
How the other felt before it showed
Like we were one, the same
Now i dont even see ur face
Gave up all that we had, it got erased

I guess thats just the danger
Cuz now we're just like strangers

Strangers
Now we're just like strangers
Strangers

Oehhh

This time
Don't fall apart from me
Your love
Is all that i really need
Our worlds dont have to collide
And pretend that were trying to get closer; baby
This time
Don't fall apart from me
Your love
Is all that i really need
Our worlds dont have to collide
And pretend that were trying to get closer

Remember when we used to know
How the other felt before it showed
Like we were one, the same
Now i don't even see ur face
Gave up all that we had, it got erased
I guess thats just the danger
Cuz now we're just like strangers
Strangers
Now we're just like strangers
Strangers
Cuz now we're just like strangers
Strangers
Now we're just like strangers
Strangers
Cuz now we're just like strangers
