It's hurtin'
It's just times
When you wish you had her back
Fellas, I know you feel me on this one
When you lose someone, That was there for you
Listen

Seen her just the other day
She had a radiant smile across her face
And I can't help but wonder what's making her happy
Does she got a man at home?
Thought she live her life alone?
It's gettin' to me cause I wanna find out fo' sure
Cause it's so hard, I don't face the reality
Does she got a man and it's done for me
That's the price I pay for letting her go
I don't wanna face the reality
Does she got a man and it's done for me
That's the price I pay for letting her go

Babe I'm lost
Nothing to gain
Till I was without you, It ain't the same
And what I don't know,
May not hurt me
That there's someone else
I bet is making you happy

How could it be, That it ain't me
I wish it were me, Oh I wish it were me (x2)
How could it be

Four Five days at the week, I'm falling
You're putting me through something that won't stop
hurting
Heard it's just a piece, But letting my heart speak
I was led to believe it's a two way street
You're the reason why I gave up my selfish please
Working hard to put you first
Re-burst to play the hurt
We could've got run miles just to make it right
Now I'm waking up, Screaming your name at night

Sorry (Sorry)
I just want you here with me

Babe I'm lost
Nothing to gain
Till I was without you, It ain't the same
And what I don't know,
May not hurt me
That there's someone else
I bet is making you happy

How could it be, That it ain't me
I wish it were me, Oh I wish it were me
(x2)
How could it be

Do you still love me like I love you
(I wish, I wish, I... I wish, I wish)
Something's gotta give to pull me through
(I wish, I wish, I... I wish, I wish)
Hoping that your lover will come right back (x4)

Babe I'm lost
Nothing to gain
Till I was without you, It ain't the same
And what I don't know,
May not hurt me
That there's someone else
I bet is making you happy

How could it be, That it ain't me
I wish it were me, Oh I wish it were me (x2)
How could it be
