She loved and left me
Still she kept me
Wanting more, but feelings empty
Did she have to go?
Will I ever know?

Love and leave me
She deceived me
The way she kissed
Was so misleading
I thought that she might stay
Then she went away
Before I couple the chapter to your name
There's a couple things I never got to say

Your eyes are wonderful
Your smile is too
Your laugh's contagious
And your heart is true
There's beauty in your touch
And your kiss is love
You're everything that every guy dreams of
You're everything
That makes me
Fall in love

It's been some time
But still I find
I'm struggling with our
Last goodbye

I thought this love would last
Now I'm living in the past
Cause it's just me
And memories of how my heart
Would skip a beat
Whenever you were near

Now you're never here

Before I find the strength
To let this go

There's a couple things
I need for you to know

Your eyes are wonderful
Your smile is too
Your laugh's contagious
And your heart is true
There's beauty in your touch
And your kiss is love
You're everything that every guy dreams of
You're everything
That makes me
Fall in love

You're everything that every guy dreams of
You're everything
That makes me
Fall in love

Your eyes are wonderful
Your smile is too
Your laugh's contagious
And your heart is true
YEAH, there's beauty in your touch
And your KISS is love

You're everything
Yes
You're everything
You're everything
That makes me
Fall in love
Yeah, in love
