Extra sensory  
Well you were gifted gifted to predict  
Extra sensory  
Communicating waiting but no words are said ESP  
Extra sensory  
People say there're tricks  
We have five you have six  
Extra sensory  
So misunderstood  
Can't explain so you're blamed ESP

Imagine from somewhere between sun and moon  
Into our dimension you flew  
A planet that we never knew  
Imagine you're gifted with some magic power  
You live high in a golden tower  
What made you pick this place and hour

Extra sensory  
Is it a potion a notion coming from the past  
Extra sensory  
Is it a prediction affliction how long will it last ESP  
Extra sensory  
How will we survive  
Have you seen what's to be  
Extra sensory  
Somewhere in you mind  
You must know what we'll find ESP

Imagine who sent for you with such success  
I don't know and could never guess  
But war would be so meaningless  
Imagine you've come to haunt our galaxy  
There's some mistake it just can't be  
We'll always fear what we can't see
