I am reflection  
I am robotic  
I am mecanic

I am a space messenger  
Some kind of cosmic traveller  
Everywhere I go  
My brain is a computer  
My mouth is a tape recorder  
Talking stereo  
Mecanic bionic  
Talking stereo

My eyes are deadly lasers  
Made for all trouble makers  
And I told you so  
Mecanic bionic  
And I told you so  
I am reflection  
This is my special song  
I am robotic  
Don't you dare get me wrong  
I am mecanic  
Come along, come along  
And I will show you how to  
Get your feet back on to the ground, on to the ground  
And I will teach you how to  
get your feet back on to the ground, on to the ground  
And I will never let you down  
I will be back, on the same track

I am reflection  
I am robotic  
I am mecanic

My heart is a pace-maker  
I will never get older  
I am a robot  
Mecanic bionic  
Somewhere in the Universe  
I've got brothers and sisters

I wish you could know  
Mecanic bionic  
I wish you could know  
I am reflection  
This is my special song  
I am robotic  
Don't you dare get me wrong  
I am mecanic  
Come along, come along  
And I will show you how to  
Get your feet back on to the ground, on to the ground  
And I will teach you how to  
get your feet back on to the ground, on to the ground  
And I will never let you down  
I will be back on the same track

I am reflection  
I am robotic  
I am mecanic

Mecanic bionic

I am reflection  
This is my special song  
I am robotic  
Don't you dare get me wrong  
I am mecanic  
Don't you dare get me wrong  
I am bionic  
This is my special song  
I am reflection  
Don't you dare get me wrong  
I am robotic  
I am mecanic
