"The Martian Way"

Visit "[The Martian Way](#)" on MotoLyrics.com

I was born in the last year
Of the twenty second century
Just before the cometeers
Come and take me away
To make me live their way
I was part of the martian way
True born child of the martian way
Always missing the martian way
Since my motherland fade away, fade away

Being raised like one of them
I was taught the secret of the stars
Now I'm into the system
But I'll never forget
Deep inside I know that
I was part of the martian way
True born child of the martian way
Always missing the martian way
Since my motherland fade away, fade away

Getting old and respected
As a chief-commander of the fleet
Even if not expected
Became a cometeer
Memories slowly disappear
I was part of the martian way
True born child of the martian way
Always missing the martian way
Since my motherland fade away, fade away
