

## Lesser Key "Folding Stairs"

Visit "[Folding Stairs](#)" on MotoLyrics.com

There are lies that linger in the air  
But we filter all the words we hear  
So they don't sound the same

We don't listen to those words  
Everyone's misunderstood  
Everything I've been waiting for doesn't feel like it  
should

Say something please  
I keep waling on these silent streets  
Follow me please  
And tell me everything is always what it seems

We've been walking on folding stairs  
And it's hiding in the hallways of your heart  
Like you don't know, like you don't care

We don't listen to those words  
Everyone's misunderstood  
Everything I've been waiting for doesn't feel like it  
should

Say something please  
I keep waling on these silent streets  
Follow me please  
And tell me everything is always what it seems
