

Lesser Key "Intercession"

Visit "[Intercession](#)" on MotoLyrics.com

You make your move, so you get comfortable
Sit back, relax, you created a fire
And when we fall asleep, speak
Unify what separated

Bring down the walls that hold us in so we can
reconnect
Sing louder to the voice within, so we can finally rest
Cause it's all we have and it's everything to us
When it slows you down, imagine where we start

You make your move, calculate the distance to love.
Imagine where we are, you trade your heart
Collateral for wishing you could fall in love, speak
Unify what separated

Bring down the walls that hold us in so we can
reconnect
Sing louder to the voice within, so we can finally rest
Cause it's all we have and it's everything to us
When it slows you down, imagine where we start

Start when you were young

Bring down the walls that hold us in so we can
reconnect
Sing louder to the voice within, so we can finally rest
Cause it's all we have and it's everything to us
When it slows you down, imagine where we start
Imagine where we start
