Watch me stop oh here it goes my moneys gone like
the air in my lungs and I'm not ready to stop yet. watch
me stop now that they're serious my friends are gone
and this feeling is shot and I'm not ready to start yet I'll
sing my lungs out I'll save this day watch me nervous
take the stage the lights and flash they call my name
focus he says but I'd rather write a song instead. watch
me nervous take the stage I'll never say the same, I'll
never say the same to you watch me stop now that
they're serious were all so serious my grades have
dropped like a flame in a bomb but I'm not ready to
stop yet I'll sing my lungs out I'll save this day watch
me nervous take the stage the lights and flash they call
my name focus he says but I'd rather write a song
instead. watch me nervous take the stage I'll never say
the same, I'll never say the same to you
