We're getting caught this time
there's never coming back
searching for these answers
searching for something that I know
cause I know it's raining
our sun is trying too hard
to give us a reason
to start all over
do you want to be alone
do you want to be afraid
cause I'm here and you're there
we're getting cut again
it's never ever cold
it's never cold
before the day is done
we say all our goodbyes
breaking what was promised
breaking all the secrets that we told
cause I know we're fading
our hearts are racing too fast
and now that we're breathing
let's take it slower
do you want to be alone
do you want to be afraid
cause I'm here and you're there
we're getting cut again
so, is this the end
I wish I was mistaken
is this the end
where we go its never cold
