I just can't believe it's true  
Lovers never loved as we two do  
Take me up one love sweet dream  
Rising, falling tell me call my name

Paradise is free  
It's concied by you love me  
And know I'll always be here forever  
Take what I can give  
For a love as given with  
All the love that we can live in together

Being here is all I feel  
Passion striveing never seen so real  
Using all to take a steer  
Lying still now floating of the near

Paradise is free  
It's concied by love love me  
And you know I'll always be here forever  
Take what I can give  
For a love as given with  
All the love that we can live in together

(interlude)

Paradise is free  
It's concied by love love me  
And you know I'll always be here forever  
Take what I can give  
For a love as given with  
All the love that we can live in together

No more games we've seen if true  
Playing all now memory used to do  
Sumers made us gone away  
'autumn raining' love u once again
