"Through The Womb Of The Moon"

Reopen the gaping wound
Blind eyes wind their way through empty sockets
Protect these horns that hide unseen within us all
The strangler, the whore that vamypr
Castarted missing bride
The vamypr cobalt ridden and exhausted
Furnace furnace
Death creates all past

Hope dies again castrated for missing bride
Reopen the gaping wound
Unseen within us all
Hope dies again
Descent through the womb of the moon
Of this crystalised red moon
Oh, this crescent that sumbolisez all unconciousness
