Like a photostat
Just another news flash
Must have been a miscast
Blame it on a circumstance
Oh probably tomorrow
Won't be any more sorrow
This time, next time

You gotta live where you are
And you gotta love where you live
Bring it all back
To where it begins
Slipped into a lowland
Sitting in the quicksand
Looking at your own hands
You thought you were a young man
Oh, wish you had a roadmap
'Stead you got an hourglass
This time, next time

You gotta live where you are
And you gotta love where you live
Bring it all back
To where it begins
Oh, to where it begin... ooh yeah...

Like a photostat (where you are)
Just another news flash (you've got love where you live)
Bring it all back
You gotta live where you are
And you gotta love where you live
Bring it all back
Where it begins
You gotta live where you are
And you gotta love where you live
Bring it all back
To where it begins
Ooh... to where it begins...
