Ravaged by jealousy
You took a chance on me
I was no easy target, you went too far, and now its my
time to leave
Looking for sticks and stones
If you want me to break your bones
Why don't you open your eyes
And realise you will never with me

Chorus:

What do you want from me?
How can I make you see?
Face the reality, til I breathe my last, you're my enemy
What do you want from me?
How can I make you see?
Face the reality, til I breathe my last, you're my enemy

Lets take it to the end
You started a years revenge
Thought you could play your games
Well I'm not the same, as in I'm nobody's fool
So don't even think about it
I'm gonna scream and shout it
And when I'm done with you, had my fun with you,
gonna wish we'd never met

Chorus

If you play with fire, you will burn, burn
If you play with fire, you will burn, burn, burn

Chorus

If you play with fire, you will burn, burn
If you play with fire, you will burn, burn, burn
