See my feet on the ground  
But it feels like the worlds gravity drowned  
When I'm with you I'm high

Instead of hiding my face  
My minds in your eyes  
Can your love embrace  
Me as I am

In the silence you stare at the world  
Your eyes are screaming to be heard  
I want to learn you inside out

Time isn't on our side  
All we have now  
For the rest of our lives  
Let's stay up all night

In the silence you stare at the world

Your eyes are screaming to be heard  
I want to learn you inside out

All that changes is time  
Can't keep you inside of me  
You're out of my mind  
I wear you on my sleeve  
In the silence you stare at the world  
your eyes are screaming to be heard  
I want to learn you inside out

I see all that you want to be  
Look into your soul  
Looking right back at me  
I want to learn you inside out
