Welcome to the end.

No men behind my country have come to see our plan  
Its time to educate ourselves and keep our minds  
sober

One peak,one army,one center of power.

One man,one army,for power. One man,one army,for  
power.

They answer upon reality ; were living in a dream.

But I fear when worlds collide

Its becoming a giant fine

Living the dream.

Suck apart the population of society to a generation of  
fear.

We completely dissociate to the power we once had.

Save me,the past is done and out of the way.

We'll be slaves under one nation,one nation

Im dying.

The media is run by the same people,who makes our  
power.

Drinking our sweat and sipping our blood for happy  
hour.

Drinking our sweat and sipping our blood for happy  
hour.

Drinking our sweat,our blood, for happy hour.
