You  
You seem  
You seemed to be so sure  
When  
When you  
Were walking out the door  
But hey  
If the world starts to get you down  
Call my name out loud  
I'll be around

You  
You say  
You say it takes one to know one  
We were ships on fire  
Halfway to a blue horizon  
But the breaks  
They never came our way  
The world seems so insane  
Some days  
Oh, you know  
If the world starts to get you down  
Call my name out loud  
I'll be around

Coz these are the days that no one likes  
They take you over  
I wish we could go where  
the years and the days all seems to fly  
Chase those doldrums from our shoulders  
We'll try  
We'll try

So if the world starts to get you down  
Call my name out loud  
Oh you know  
I want you back again  
If I just called out your name  
Would you come round?
