

Lights "White"

Visit "[White](#)" on MotoLyrics.com

White, white, white, white
White, white, white, white

Are there oceans full of things you never say?
Are there skylines of the cities you don't see?
Is there music muted playing underneath?
Is mathematics keeping you from thinking free?

Do you see lights?
Turn your shadows white

White, white, white, white
White, white, white, white

Don't let rain clouds
Cry at all of your parades
Let the other side of darkness kiss your face

Into the sea, into the sea

Do you see lights?
Turn your shadows white

Do you feel bright?
Turn your shadows white

All the things I want to say
All the shadows in the way

Do you see lights?
Turn your shadows white

Do you feel bright?
Turn your shadows white

White, white, white, white
White, white, white, white
