I Need You

Verse 1

I stumble through the darkness
and it seems so very hopeless
but your always at my side
and you you hold my hand
and through it all I realize
with out you I can't survive

Chorus

I need you like no one else I've ever known
and I need you like no one else I'll ever know

Verse 2

And the world calls me away
but I never will obey them
the foolish words that they say
cause I I can not leave your side
you give me peace of mind
when no peace can be found
