Ropen av h gsta fruktan
Slets ur m nniskans strupe
N r kaoset kom fr n ett djup
Ett djup d r mer  n en skugga kan f rnimmas

Ty jag  r inte d dlig
Jag  r din frukta &  ngest
N r de levandes skrik  r endast ett eko
 r jag den som leder er till evig pest & pina

Evig natt r der  ver m nniskans sinn
N r satan lever genom er
Evig natt r der  ver den gode
N r himmelriket brinner

[English translation:]

Eternal Night

The cries of highest fear
Ripped out of the human throat
When the chaos came from a deep
A deep where more than just a shadow can be sensed

For I am not mortal
I am your fear & angst
When the screams of the living are but an echo
I am the one who leads you to eternal plague & torment

Eternal night prevails over human minds
When satan lives through you
Eternal night prevails over the good one
When heaven burns
