I have learned of all the pain that comes with life  
Maybe once everything would turn out right  
Unfamiliar chills run down my spine  
Capturing a moment that i was meant to find

Goodbye means forever  
So I say "until we meet again"  
Someday that will last forever  
Time will heal and make things better  
x2

Here I am  
Stuck in time  
Never ahead, always a day behind  
As your pictures fade  
your memories get clearer  
it adds to the pain,  
but it only brings you nearer

Goodbye means forever  
So I say "until we meet again"  
Someday that will last forever  
Time will heal and make things better  
x2

I did promise i'd be back someday  
But i'm never handed cards that I can play  
All we can do is wish upon  
The same night sky we've been dreaming on

All we can do is wish upon  
The same night sky we've been dreaming on
