Big fish in a small pond
I'm like a frog in a puddle
I'm hoping she's staring at me not her reflection
Cause little she knows I'm a prince and
We belong in a castle
If I could speak to her I'd ask her to

Bring me back to life again
A simple kiss could break right through my heart you
can
Would you bring me back to life
Once upon a time there lived a man that ruled the
world
It's hard to believe that that was me
Would you bring me back to life
Life
Woah woah yeah

Thinking of ways to convince her
That fairytales do exist yeah
If she could break this spell our love would be a
storybook
You don't have to wait for the right day
Take me now let's go ride the pages
I'm ready to show the world we'll rain on our parade
So baby hurry
Come and wake me
From this deep sleep
I've been living in this nightmare
Feels like for a million years

Bring me back to life again
A simple kiss could break right through my heart you
can
Would you bring me back to life
Once upon a time there lived a man that ruled the
world
It's hard to believe that that was me
Would you bring me back to life

There's nothing difficult to...

Just press your lips against my lips
All the way past girl
I need your cpr
I wanna feel my pulse again
Don't be scared to give it
You can make life flow through my veins again
Look into...

Bring me back to life again
A simple kiss could break right through my heart you
can
Would you bring me back to life
Once upon a time there lived a man that ruled the
world
It's hard to believe that that was me
Would you bring me back to life again
A simple kiss could break right through my heart you
can
Would you bring me back to life
Once upon a time there lived a man that ruled the
world
It's hard to believe that that was me
Would you bring me back to life

Big fish in a small pond
Like a frog in a puddle
She broke the spell just in time
And brung me back to life
