No Where!

Waah waah waah

I can take you through it tonight, like it when it feels  
right  
It's like trapped in my head and the colors in my mind  
I believe that you're here by my side, I got get out of  
this house  
Flush into the traffic just to make you take a hoop  
And break from the smear just to swallow up a ride  
from you  
Ready to try something new, but baby it's up to you...

[Chorus:]

Before the sun start to rise  
We could be high in the sky's  
Nothing would feel better than us together...  
Face to face, eye to eye, body to body would be so  
right right right!  
Put me off into a chance to never look back, Take a risk  
and disappear somewhere off the map  
All u need to bring along...  
It's just self so grab my arm  
Now let's get lost in the middle of (nowhere) [x2]  
Escape to the middle of (nowhere) [x2]  
I'll be safe as long as you there baby  
I'll be fine here at nowhere...  
So let's get lost in the middle of nowhere!

Destination unknown doesn't matter where we go  
Let's explore through horizons of them in the world  
Get ready for us to say...  
To another land we're taking chances, leaving all of the  
problems behind starting over again yeah  
Tonight baby never last away  
And baby it's up to you...

[Chorus]

Before the sun start to rise  
We could be high in the sky's

Nothing would feel better than us together...  
Face to face, eye to eye, body to body would be so  
right right right!  
Put me off into a chance to never look back  
Take a risk and disappear somewhere off the map  
All u need to bring along...  
It's just self so grab my arm  
Now let's get lost in the middle of (nowhere) [x2]  
Escape to the middle of (nowhere) [x2]  
I'll be safe as long as you there baby  
I'll be fine here at nowhere...  
So let's get lost in the middle of nowhere!

Struggling on the island, stuck with everybody  
No one around us followed by no body, no Location no  
telling what happens...  
Which means no body can see us so go fit yours go fit  
yours...  
Air in my eyes, get lost for hours  
Drive away my mind, I let you into it so amazing so  
much I've been saving for your love...  
Come and get on my love go fit yours go fit yours!

[Chorus]

Put me off into a chance to never look back...  
Take a risk and disappear somewhere off the map...  
All u need to bring along...  
It's just self so grab my arm  
Now let's get lost in the middle of (nowhere) [x2]  
Escape to the middle of (nowhere) [x2]  
I'll be safe as long as you there baby  
I'll be fine here at nowhere...  
So let's get lost in the middle of nowhere!
