Never slam the door, never raise your voice  
Never let me down, you were known to keep your word,  
baby  
Always hold me down, always looking out  
Always missing me, reminding me I was your man,  
baby  
Through it when I fell, through it, you were there

Through the fire, through the wire, through me with it  
all, baby  
Forever we plan, forever your man, forever we stand  
Now you're letting go of my hand, baby  
Still I wasn't filling all the voids, thunder came but we  
didn't hear the noise  
Hiding inside, didn't see the lightning when it struck

If you don't tell me I'll never know  
'Cause I've been thinking it's sunny all along  
That's what we telling each other  
'Cause we're so lost in this quiet storm  
Gravity let us go and now we're floating away miles  
apart  
You should've let me shield you  
From the drizzle of this quiet storm  
Storm, storm, storm, storm, storm  
Stuck in this quiet storm

Never knew you cried, never spoke your mind  
Never seen the way that you broke my heart, baby  
Always rushing in, always suspicious  
Always trying to convince you to put down your guard,  
baby  
Perfecting a smile through living with doubts  
Through the fears, through the years, through it lost  
my mind, baby  
Forever it snowed, forever gone, forever was an  
unrealistic dream, baby  
Still I wasn't filling all the voids, thunder came but we  
didn't hear the noise  
Hiding inside, didn't see the lightning when it struck

If you don't tell me I'll never know  
'Cause I've been thinking it's sunny all along  
That's what we telling each other  
'Cause we're so lost in this quiet storm  
Gravity let us go and now we're floating away miles  
apart  
You should've let me shield you  
From the drizzle of this quiet storm  
Storm, storm, storm, storm, storm  
Stuck in this quiet storm

We're discovering a test, guess our love was dated  
Took too many hits to bend, I decide to shake then  
I'm starting to realize we may not be right  
Two of a kind or are we just killing time?  
Time, time, oh yeah

If you don't tell me I'll never know  
'Cause I've been thinking it's sunny all along  
That's what we telling each other  
'Cause we're so lost in this quiet storm  
Gravity let us go and now we're floating away miles  
apart  
You should've let me shield you  
From the drizzle of this quiet storm

If you don't tell me I'll never know  
'Cause I've been thinking it's sunny all along  
That's what we telling each other  
'Cause we're so lost in this quiet storm  
Gravity let us go and now we're floating away miles  
apart  
You should've let me shield you  
From the drizzle of this quiet storm  
Storm, storm, storm, storm, storm  
Stuck in this quiet storm
