What if i say i'm willing to come about
And i never meant to push you away
Didn't mean to count you out
Would it be too late if i beg you now
Or did i use up every apology
Is it the end for you and me

When you said i'll regret at the day that you leave my
life
You were right, should've listened then
Cause the trouble i'm in is

When your friends come around
But you're tryna get away
Cause there's only really one face that you're tryna see
But she needs a break
Going through symptoms of a heartache
Days
Since the last time that you even ate
You just don't know how to get her off your brain
You can't sleep, can't get rid of the pain
Going through symptoms of a heartache
My baby, missing my baby
Symptoms of a heartache
Can't take it, i'm going crazy
Going through symptoms of a heartache

My whole world's been turned upside down
And i hate to admit my life's dysfunctional
I see now why you wanna leave me alone
But i'm growing everyday without you baby
I'm learning on my own

When you said i'll regret at the day that you leave my
life
You were right, should've listened then

Cause the trouble i'm in is

When your friends come around
But you're tryna get away
Cause there's only really one face that you're tryna see

But she needs a break
Going through symptoms of a heartache
Days
Since the last time that you even ate
You just don't know how to get her off your brain
You can't sleep, can't get rid of the pain
Going through symptoms of a heartache
My baby, missing my baby
Symptoms of a heartache
Can't take it, i'm going crazy
Going through symptoms of a heartache

Friends come around
But you're tryna get away
Cause there's only really one face that you're tryna see
But she needs a break
Going through symptoms of a heartache
Days
Since the last time that you even ate
You just don't know how to get her off your brain
You can't sleep, can't get rid of the pain
Going through symptoms of a heartache
My baby, missing my baby
Symptoms of a heartache
Can't take it, i'm going crazy
Going through symptoms of a heartache
