[Spoken:]

Well there's many girls of my age group  
Come out of their teenage years  
And going into womanhood  
Becoming a young lady and they go threw  
Different like... emotional rollercoasters  
And when you on a rollercoaster  
Like in regular life you can't get off  
In the middle of the ride  
You gotta ride it out until it stops  
And at the end of that ride  
It feel like that rollercoaster was fun  
Even though it might had a couple of  
Twirls, Spins and Drops that made you cry
