Chorus:

Every day (day),
Every night (night)
I wanna see you baby,
Stayin' by my side. (by my side)

I'm going down on my,
On my knees for you. (you)
For your love I'd do it,
For your sake, believe I do. (do)

If you don't love me,
Why do you raise my hopes?
No matter what happens,
I can't let you go.

You got it wrong,
I didn't wanna hurt you.
I wanna give the whole world to you.

Verse 1:

I've not the faintest idea,
Why aren't you talkin' to me?
I'm trying to be the perfect man,
You always want me to be.

I'm accustomed to you,
You're a part of my life.
Everything I told you honey,
I've nothing to hide.

You're my little angel,
You're my little star.
I'm still waitin' every hour,
You're so close to my heart.

All my life I've been waitin',
For one moment in time.
We're together I adore your eyes,
I so adore your sweet smile (girl).

I don't give a damn about what somebody told you.

I'll ever be your man 'cause baby I love you.
If the worse comes to the worst,
I'm gonna hold you.
I feel you're far from believin' it.

We walk through a world where nobody has been
before.
Turn back the hands of time open every door.
I swear I will allay your doubts and sure I love you
more,
To retrieve your affinity.

Chorus:
Every day (day),

Verse 2:

You look into my eyes,
You put me out of my misery.
I have never told lies,
I hope that you come back to me.

I want to spend my time of lovin' you forever
No matter what happens,
We must stick together.
Come on trust in my words,
Give me your heart back again.

Kiss my lips, touch my hand,
Give me a second chance.
My heart is pumpin',
Have a feeling that I've never felt,
If I'm allowed to be with you,
The luck is coming to my world.

So far as I remember, you was perfectly happy to find
someone like me,
In a world full of traffic.
I fulfill your dreams,
It's not only a taffy...
You're the only one for me.

We walk through the world where nobody has been
before.
Turn back the hands of time open every door.
I swear will allay your doubts and sure I love you more,
To retrieve your affinity.
