Chief
"Night & Day"

I see, see, see you about every night
But my heart don't, It don't feel right
And you took, took, took me for all I've got
Now I'm a poor man, completely lost
And you stop, stop shaking when you get old
Oh I cannot see what you've come to be
And it's hard, it's hard to break your bond
How much more can send you back home again

Take me away, I don't care what the place
I just can't see your face, every night and day
When you appear I know I won't be here
I just can't live in fear every night and day

So I walk down to the shore
And say the same, the same thing that you said before
And I don't care If I lose my mind
Oh you come to me
Asking me to breathe, and I say

Take me away, I don't care what the place
I just can't see your face, every night and day
When you appear I know I won't be here
I just can't live in fear every night and day

Take me away, I don't care what the place
I just can't see your face, every night and day
When you appear I know I won't be here
I just can't live in fear every night and day
