I need you (back)  
I love you (girl)  
I want you (back)  
(Girl let me come back ) I just can?t go on without you  
girl (just let me come back )

Kicked out of my girls past to bad I deserved  
That but I did I popped of at the mouth like  
A kid and now I think about the consequences  
Of how I make her feel and why I?d make  
Her feel like that when she loves me for real  
For real that?s the real deal  
I love her to but you could probably never tell by the  
Way she was spoken to and the way that I treated her  
She don?t need that especially when she takes care of  
me  
When I?m needing her I need her now she ain?t around  
I?m feeling down and I feel like I?m losing my mind  
Were together all the time I can?t stand the separation  
Why would I wanna cause her all this aggravation  
It?s a frantic situation now I?m waiting and I?m wishing  
Hoping that she give me a call I keep on thinking that  
my  
Phone is ringing who am I kidding it isn?t ringing at all  
(just let me come back
