California sun
Shining through the window
Beating up and down
Like a yellow yo-yo
It's just the sun

California
California

Annie's got a gun
She knows how to use it
Points it at the sun
It's a California shoot out
She's got a gun

California
California

California, California
California, California

California, California
California, California

California sunset
Orange skies by day
California dreaming
The California way

Smoke is another stranger
Lying by the pool
Dying to be near you
Ow, we look so cool
Yes, we do

California
California
California
California

California
California

California
California
