Go! Ye-ow!

Pain ain't even really what you wanna be  
5 feet under seeing your humanity  
The opportunity to divide  
The opportunity of being apart!!

Soon be there, the moon in the sky tonight  
We're burning on a purified  
Smash your face and then I beat it down  
Are we really gonna die?!

Get up and fight, release your rage, come on and fight  
Standing straight faced, it is your fate, calling my  
name  
Calling me pain, and if you stay, you'll bite the scythe  
Waiting for you I want to just tell you  
If you want peace, prepare for war!  
Fuck!

Get up and fight, release your rage, come on and fight  
Standing straight faced, it is your fate, calling my  
name  
Calling me pain, and if you stay, you'll bite the scythe  
Waiting for you I want to just tell you

Get up and fight, release your rage, come on and fight  
Standing straight faced, it is your fate, calling my  
name  
Calling me pain, and if you stay, you'll bite the scythe  
Waiting for you I want to just tell you  
If you want peace, prepare for war!
