Till the end of time

Everyday when I talk to you
You tell me that you love me
I still remember what you said
You came into my life, and you showed me
True love endless like a dream
Now thoughts of us go through my head
If you believe, how I feel when I'm with you
Then my eyes are telling you, that I'm here with you to
stay

Till the end of time
I live and die for you
Knowing you're the one that makes me feel this way
Till the end of time
I give my All to you
Cause I love you more than words could ever say
Till the end of time

Here we are
Just the two us together taking our time
Why rush a good thing when it's fine
I've waited for so long
But Reality is fantasy it seems
This type of love is hard to find
If you believe, how I feel when I'm with you
Then my eyes are telling you, that I'm here with you to
stay

Till the end of time
I live and die for you
Knowing you're the one that makes me feel this way
Till the end of time
I give my All to you
Cause I love you more than words could ever say
Till the end of time
