From now on we are enemies... You and I.

I'm an outcast on the path of rebound  
Everything is frail, I desolate, crush, and burn  
I have chosen darkness to be my guide  
War is in my heart, death is by my side

Warheart! No remains from compassion or love  
Warheart! Hate your fellow as yourself

I have chosen night to be my guide  
When the daylight strikes, I hide in my trench and die

I'm the cold-blooded killer who'll fuck you up!

Warheart! No remains from compassion or love  
Warheart! Hate your fellow as yourself

I'm the warheart, I'm dying to win the battle I live  
everyday  
One for all and all for me I'm an animal better set me  
free

I'm an outcast on the path of rebound  
Everything is frail, I desolate, crush, and burn  
I have chosen darkness to be my guide  
War is in my heart, death is by my side

Warheart! No remains from compassion or love  
Warheart! Hate your fellow as yourself

Warheart! I'm the warheart,  
I'm dying to win the battle I live everyday  
One for all and all for me I'm an animal better set me...

Warheart! I'm the warheart,  
I'm dying to win the battle I live everyday  
One for all and all for me I'm an animal better set me  
free
