"Astral Projection"

Leaving the body into a spectral scenery
Floating virtually on the outer surface, a return to
abstract fantasy
Ethereal hallucinations, lucid dreamlike manifestations
When the soul emancipate from life, engulfed by an
electric veil of light
Pulsating ambiance of psychokinetic energy
Revolving nebulous mist, astrophysical journey
Ghostliness of the unknown, voices call from beyond
Disengage the soul from the body
Power-driven by dark occult reveries, deep sleep
phenomenon, astral projection
A prospect of life after death, levitate to arcane destiny
Orbiting the terrestrial soil, reach the zenith of
ascendancy
A conduit, voyager, zooming across the periphery
Adapting wraithlike shapes of existence
Escaping the ephemeral earthly shell where the soul
dwell
Watching, dreaming of illumination, perception,
redemption
A passage to the vaporous interstellar domain
Hypnotic trance, post mortem scenarios, gazing into
deserted forlorn horizons
Amorphous shadows, dark tunnels, flashing lights
Tranquility space, cryogenic slumber, remoteness,
oblivion
An epic encounter with the darkness of death
The emission of light from the sun is dying
Falling into the void of hypothermia, as freezing
airstreams encircling
