Every time you walk away or run away
You take a piece of me with you there (x2)

Oh it seems I'm walking right to your door
With my hearts still resting, looking for something
more
Are you ever going to see everything you mean to me?
I'm trying really hard to believe

Every time you walk away or run away
You take a piece of me with you there (x3)

Nothing feels right when I'm left here on my own
Left last night
It seemed like I waited too long
Are you ever going to see everything you mean to me?
I'm trying really hard to believe

Every time you walk away or run away
You take a piece of me with you there (x2)

Come back to me
You smile and you make my life complete

Every time you walk away or run away
You take a piece of me with you there (x6)
