I took the torch out of his old flame
Now he's chasing after a faster train
I used kisses sweet as rain
When I took the torch out of his old flame

She had a chance to wear his ring
But she had her mind on other things
Now he's through playing her little games
'Cause I took the torch out of his old flame

All it took was one little look of love
Now he's burnin' for my tender touch
So sincerely

I give him everything he needs
Every time I hold him close to me
And when I started whisperin' his name
I took the torch out of his old flame
