When the sun comes up and I awake
I think of you
When I walk out to meet the day
I think of you
When the morning wind is in my face
I think of you
And you're on my mind
On my mind
And you're on my mind all the time

When the sun gets high and heats the day
I think of you
When the air is still and the earth ablaze
I think of you
When the shadows stretch and start to fade
I think of you
And you're on my mind
On my mind
And you're on my mind all the time

When the sun gets low and the day gets cold
I think of you
When the evening winds rise up and blow
I think of you
In the nights of silver black and gold
I think of you
And you're on my mind
On my mind
And you're on my mind all the time

When the sun gets low and the day gets cold
I think of you
When the evening winds rise up and blow
I think of you
In the nights of silver black and gold
I think of you
And you're on my mind
On my mind
And you're on my mind all the time
