"New World Soccer"

Visit "[New World Soccer](#)" on MotoLyrics.com

Just words
just words
make a new disaster
psichedelic war
tanks in church
god bless you all: holy iron, holy iron
is like futurism but with no poetry in
my mind
soldiers are running naked
don't mind
Osama Bin Laden to George Bush
on the left to Saddam Hussein,
a cross for Tony Blayr, in area, Blair to Beckam
David Bekam is shooting...and it's a wonderful goal!!!!!!

'cause the fear is weakness
first law
across your mind limits
just watching your respect for nothing
you gonna come back, shoulda come back
be welcome in the new worldwide order
i'm waiting for you

let's break down the door
of lies all around the world
someone is screamin now
Let's break down the door
i can't explain but millions of people are shouting
against a wall
Let's break down the door
I can't believe in your word
I can't understand a shout underwater
Break down that door

Back, back, back
rewind
what 's new? chatolic punk, liberal comunist
brokers playng domino with the other's life
i launch an A.P.B.* on god
sell sell
buy buy
die, look

different people under the same sky
Take another pill of bromide

and freeze your mind
plunge the world into a party
bloody honey
everyone in a doggy style
the end is comin
someone call it justice
winners and losers are running togheter
to catch the price with no rules, no lights
live from cnn
the end is coming

'cause the fear is weakness
first law
across your mind limits
just watching your respect for nothing
you gonna come back, shoulda come back
be welcome in the new worldwide order
i'm waiting for you

you got it your solution in you
get it
think if what you got
it's not enough
escape: they wanna take us down
get him
escape: they wanna take us down
the wanna take us

let's break down the door
of lies all around the world
someone is screamin now
Let's break down the door
i can't explain but millions of people are shouting
against a wall
Lets break down the door
I can't believe in your world
I can't understand a shout underwater
Break down that door
