You want a no-risk guarantee before you take a chance
You wanna know how the song will end before you start
to dance
Well, I can't foretell the future, but my heart clearly
sees
Your hand in mine for a long, long time if you could just
believe

And take a leap of faith, cast away your doubt
Darlin', come what may, we can work it out
A love that's real will always find a way
If you'll trust in me like I trust in you
There's no rain or fire that we can't go through
The first step's always the hardest one to take
It's a leap of faith

I understand all your doubts and fears of laying your
heart on the line
But aren't you afraid of just throwing away a love like
yours and mine
I know your heart's been broken
You've been let down before
Though the stakes are high, give it one more try
This time you can be sure

And take a leap of faith, cast away your doubt
Darlin', come what may, we can work it out
A love that's real will always find a way
And if you'll trust in me like I trust in you
There's no rain or fire that we can't go through
The first step's always the hardest one to take
It's a leap of faith

If you'll trust in me like I trust in you
There's no rain or fire that we can't go through
The first step's always the hardest one to take
It's a leap of faith

It's a leap of faith
