# "Notes in Constellations"

Visit "[Notes in Constellations](#)" on [MotoLyrics.com](http://MotoLyrics.com)

I see her smile in her sleep  
And know that she's a dreamer  
I'll follow every move she makes

It's been a long, long night  
Say you're mine  
Say you're mine  
Can I keep you tonight, tonight?

We dance around just like constellations  
To keep her body warm  
We dance around just like constellations  
You're keeping me awake at night  
You make my body warm

And I fall for her  
One step from the sky  
Crash and kneel, I land in her arms

And I melted away  
Like snow into the ground  
I told her I gotta go, I gotta go

And we dance around just like constellations  
To keep her body warm  
We dance around just like constellations  
You're keeping me awake at night  
You make my body warm

It's been a long, long night  
To say goodbye  
I felt so bad but I have to go  
No, she never wanted me to leave her behind  
No, she never wanted me to leave her, to leave her

And we dance around just like constellations  
We dance around just like constellations  
We dance around, we dance around  
We dance around, we dance around  
We dance around, we dance around

You make my body warm

You make my body warm

We dance around, we dance around

We dance around, we dance around
