my girl is looking like Jane Bond now
she wants to be a superhero
and I'm in love with her indeed
my girl is looking like Jane Dean

she has a russian laser pistol
she fights the aliens from marsn
she works for the secret service

that's why she often meets some stars
she is my girl
made in California
so take me to the place I long to be
living in Oklahoma
she is the girl

why are you so far away from me?
don't need no dresser of hair
she often leaves me feeling lonely
she goes to model competitions

and keeps me waiting in despair
she is my girl
made in California
she is the girl
so take me to the place I long to be
living in Oklahoma
why are you so far away from me?

(shake it shake it I need some surfin' wax, Baby)

so take me to the place I long to be
she is my girl
she is the girl
maid in California
living in Oklahoma
why are you so far away from me
