He spent too many years
Walking alone spending time
Like I spend money on beer
I used to be that way
Expected too much I guess
Two days then get me out of this mess
Come on now
You turn your darkness to light
Don't be afraid and trouble will stay out of sight
But what if my life crashed down
What if the sky grows too dark
Would you ever see the spark
What if the wind's too strong
What if I always do you something wrong
Burnt once, now I'm sore
I'd rather stay outside and have fun
While you're opening doors
I used to be that way
Expected too much I guess
Two days then get me out this mess
Come on now

You turn your darkness to light
Don't be afraid and trouble will stay out of sight
But what if my life crashed down
What if the sky grows too dark
Would you ever see the spark
What if the wind's too strong
What if I always do you something wrong
You're so, you're so afraid
My baby
Love, love
I will be there
I will be there
But what if my life crashed down
What if my life crashed down
What if the sky grows too dark
Would you ever see the spark
What if the wind is too strong
What if I always do you something wrong
Something's wrong
But what if my life crashed down
What if the sky grows too dark
Would you ever see the spark
What if the wind's too strong
What if I always do you something wrong
