(l. stansfield/i. devaney/a. morris)

This girl:-

She walks, she talks, she eats, she sleeps  
But she can't seem to get her mind together  
She lives her life in the lonely night  
There isn't anyway to help her  
The most she gives is a curve of the lips  
To tell you that she's listening  
She gave her life to a mean device  
She gave it to a love machine

Chorus:

She doesn't understand the pain, her seedy life  
Living without pride or shame  
Giving into everything, her seedy life  
She only has herself to blame

This boy:-

The boy she knows is sucking her up

And never giving anything  
He lives a life of pure delight  
This greedy ignorant guy  
He takes his cut of the love she has  
And then he comes back for more  
She screams and shouts, it's wearing her out  
But he's all that she's living for

Chorus

She walks, she talks, she eats, she sleeps  
Never knowing nothing  
She gave her life to a mean device  
She gave it to a love machine

Chorus and fade
