All my life I keep on searching for that special thing  
How I've tried to always find a love and  
understanding To always see the light of day and to  
know that I am living All my life I'll  
never take if I'm not giving

Only when the rain comes down Only when the  
lightning strikes me Will I find the answer  
for myself

It's got to be real  
Be the best nothing less than wonderful It's got to be  
real this time What's waiting there  
inside  
It's got to be real  
Knowing love know it can be powerful It's got to be  
really love So we can rise above

All my life I try to see the love inside myself And I keep  
on trying in no uncertain terms To  
let my light shine through

Only when the rain comes down  
Only when the lightning strikes me  
Will I find the answer for myself  
To always see the light of day and to know that I am  
living All my life I'll never take it I'm  
not giving

Only when the rain comes down  
Only when the lightning strikes me  
Will I find the answer for myself

It's got to be real  
Be the best nothing less than wonderful
