Song: When I Get You Alone Lyrics

All alone in my bed tonight
I find myself dreaming of all the things I might
Do To you, and do for me behind closed doors where
nobody else will see
I know when I get you alone
There's gonna be trouble
Just hope that I won't lose control
I'll have you seeing double
Fanasties and dangerous dreams
All have my head spinning in a world of schemes
What to do when it's up to me to
Take you places you have never seen

CHORUS

All of my life They told me I'm wrong
I thought they were right, but then you came along
I finally believe, and now I can see
I was right all along, and it brought you to me

CHORUS
