remember the time when you and i were still in love we  
lived at the beach to be with people that felt the same  
remember the songs that we used to sing back when  
we were groovin' wherever we go we're always at  
sikome beach remember the time at the bar out by the  
campgrounds wondering how bangers swim in cut off  
blue jeans we floated away on a double blue air-  
mattress thinking about the islands and the streams  
wherever we go we're always at sikome beach well the  
sun was hot and we would know that it would take  
forever just to get back to the shore we're gonna see  
our friends just to sit and dream there won't be another  
time that i will feel so free until we reach sikome beach  
we always got sikome beach [x3]
