The Choir - After All

Are we mere specks of dust
Floating in the Milky Way?
Are we here to learn to love?
I think that's true either way
Come winter, come spring
Come summer, come fall
Come winter, come spring
Come summer, come fall
You're floating with me after all
I'm floating with you after all
We're on a cosmic ride
Let's hope to greet the dawn
For sure the glorious night
Will be long gone forever soon
The owl is on the spy
The cat is on the prowl
I say we step outside
and howl at the moon
We're on a cosmic ride
So good to be together
Have a joyous flight
Should by death our spirits part
The lynx is keen of sight
The bat is on the wing
I say we step outside
And sing to the stars
Are we mere specks of dust
Floating in the Milky Way?
Are we here to learn to love?
I think that's true either way
Come winter, come spring
Come summer, come fall
Come winter, come spring
Come summer, come fall
You're floating with me after all
I'm floating with you after all
