break it down to me
you really think it's all that easy
you shouldn't even waste your time
and don't you
feed the lines with all your shit cause
ignorance makes easy critics
media with wrong direction
is more than we're asking for
you write us off
false authority is fine but it's all for the narrow minded
you don't understand
the position that you really so far off
another biased view
judging all our true intentions
somehow it looks to me
you don't seem to call the shots that fair
i give it everything
no compromise for what you say it's all the same
how can you meant to say
is different from the way that it's supposed to be
what you portray is all the same you're so far off
