

Choking Victim "Sweet Dreams"

Visit "[Sweet Dreams](#)" on MotoLyrics.com

[Originally by Eurythmics]

Disease in your bloodstream,
genocide by chemical means,
its too late for apologies,
governments are always trying to kill someone.

now you will die, -toxic oil goverment lies!

government wants to use you,
the government chemists create a brew,
simply provided to kill you,
biological warfare is nothing new.
now, its too late. meet your death, toxic flames.

Disease in your bloodstream,
genocide by chemical means,
its too late for apologies,
governments always wanna kill someone.
